

The worldwide leader in applied LED technology

Dialight defines the current state of LED lighting technology with continuous innovations in light output, efficacy and reliability. Dialight specializes in producing retrofit LED Lighting fixtures designed specifically for hazardous locations, obstruction lighting, traffic and rail signaling as well as for more general industrial and outdoor situations where their products deliver vast reductions in maintenance needs, save energy, improve safety and ease disposal.

DuroSite™ LED Area Light

Application:

Dialight introduces the new state of the art LED DuroSite™ area light for tough and harsh industrial locations. Its rugged solid state design creates a new era where failed lamps and expensive relamping costs become a thing of the past. This light incorporates both cutting edge LED technology along with proprietary optics to achieve area lighting comparable with other traditional light sources. By focusing the light where it is needed, this luminaries is the most efficient light source available for industrial area lighting applications. Its green credentials include significant energy consumption savings and reducing light pollution.

Whether your application is a power plant, paper mill, steel mill or bottling this fixture offers improved performance across the board.

DuroSite™ LED White Downlight

Application:

Dialight introduces the new state-of-the-art fixture for industrial general lighting. Its rugged solid state design creates a new era where failed lamps and expensive relamping costs become a thing of the past. The RTO series incorporates cutting edge LED technology and is the most efficient light source available for industrial lighting applications. Whether your application is in a refinery, oil platform, chemical plant or any other industrial application, this fixture offers improved performance across the board.

All of Dialight's long life LED luminaires are designed to meet the most demanding specification criteria while offering maximum energy savings, reduced maintenance costs, and a superior quality of light.

DuroSite™ LED High Bay Fixture

Application:

Dialight's DuroSite™ LED High Bay fixture was designed specifically to replace conventional lighting in a wide variety of industrial applications; both indoor and outdoor. Its low profile light weight design and versatile mounting options make it ideal for many applications such as warehouse, garage, aisle, cold storage, bridge, tunnel and general area lighting.

All of Dialight's long life LED luminaires are designed to meet the most demanding specification criteria while offering maximum energy savings, reduced maintenance costs, and a superior quality of light.
