

CADDY® PYRAMID ST Series Strut-based Thermoplastic Supports

Features

- Versatile: Ideal for a variety of rooftop applications; provides superior support for pipe, conduit, duct, cable tray and equipment.
- High load capacity: Structurally engineered to support up to 1,500 lbs.
- Height adjustable
- Long-lasting performance: UV-stabilized and weatherproof.

Applications

To support pipe, conduit, duct, cable tray and equipment on rooftop applications

The CADDY® PYRAMID line of rooftop pipe supports offers superior load capacity and dramatically reduces installation time by replacing slow, heavy and labor-intensive methods to support pipe, conduit, duct, cable tray and equipment.

CADDY® ROD LOCK Beam Clamp: CRLB37EG & CADDY® ROD LOCK Smart Nut

Features

- Works with slightly damaged threads and minor burrs on the threaded rod
- Reduces installation time up to 60%
- Load capacity up to 500 lbs- depending on flange thickness
- UL® 203 & UL 2239 Approved

CADDY® ROD LOCK is an innovative threaded rod mounting system from ERICO that provides a quick and economical solution for installing electrical and mechanical systems supported by threaded rod. With its breakthrough "push-install" design, the CADDY ROD LOCK simplifies the installation of threaded rod. Simply push the threaded rod through the mounting hole and it instantly locks into position. CADDY ROD LOCK is another innovation from ERICO designed to help the construction industry complete projects faster, easier and more efficiently.

CADDY® Speedlink Universal Support System

ERICO introduces CADDY® SPEED LINK LD - a universal support system that quickly suspends static loads, even at an angle. It is a cost-effective alternative to jack chain, threaded rod and associated hardware in lighting and other installation projects.

CADSLD15Y300L3 SPEEDLINK Y-TOG
(78285661641)

Features

- Holds working loads of up to 20 kg (44 lbs) with a 5:1 safety factor.
- A small, aesthetically pleasing locking device completes the assembly. This low-profile stainless-steel device helps ensure stability and allows for additional vertical adjustment after wire insertion. A small screwdriver releases the lock for fast installation adjustments.
- Installs without drilling or tools and allows objects to be hung at an angle.
