

LEVITON

The Industry's First Slide Dimmer Designed for Use with the Widest Variety of Dimmable CFLs

Enjoy the energy-saving benefits of dimmable compact fluorescent lamps, but with improved ambiance and lighting options. The Decora CFL Slide Dimmer optimizes the performance of dimmable CFLs and works with the widest range of dimmable CFLs. Innovative and versatile, the preset dimmer in auto mode will detect whether a lamp is an incandescent or dimmable CFL, determine low-end dimming capabilities and adjust the dimmer range accordingly. It outperforms incandescent dimmers when controlling dimmable CFLs.

A breakthrough product, the CFL Slide Dimmer replaces a standard switch, uses standard wiring and has a shallow depth for easy installation. Finally, a CFL dimmer that really controls dimmable CFLs.

LEV6673-10W SURESLIDE CFL DIM
07847751529

Features:

- Controls CFL & Incandescent lamps
- Single-Pole & 3-Way
- 300W-120VAC CFL Rating
- 600W-120VAC Incandescent Rating

NEW SmartlockPro[®] Slim Series GFCIs Install in Any Electrical Box

When it comes to GFCI installation, size really does matter. That's why Leviton has trimmed the profile of their industry-leading Smartlock Pro GFCI receptacle to fit into any wallbox, even shallow ones. The new slim series GFCI has all the advanced lockout features of traditional SmartlockPro devices, with added benefits that make installation easy for electricians.

Slim Series Features:

- Reduced depth makes it easier to install in any electrical box, even shallow ones
- Saves time on the job
- Only 1.026" protrusion into wallbox
- Terminals allow for easy wiring options - back and side wire capable
- External back wire clamps provide visual indication of proper clamping
- Standard brass self-grounding clips

SmarlockPro[®] Features:

- Automatically tests the GFCI every time the RESET button is pushed in. The GFCI will no reset if its circuit is not functioning properly.
- Blocks the RESET button if GFCI protection has been compromised, reducing the possibility of end-users incorrectly assuming that a reset GFCI is providing ground fault protection when it is not
- Patented bridge contact provides individual sets of contacts for GFCI receptacle face and downstream receptacles.
