

Beat the Deadline.

Your mission should you choose to accept, is to convert your T12 to T8 technology before the July 1st DOE magnetic deadline.

Mission Briefing

Featured Products

Basic-12[®]

Technology for magnetic ballast replacements

- Exceeds Federal ballast efficiency requirements including the 2010 requirements for replacement ballasts
- Generates energy savings of greater than 20% when replacing a magnetic ballast while still using the same T12 lamps

A Triad[®] Brand

High efficiency T8 electronic ballasts - the ultimate combination of flexibility and efficiency

- Up to 8% energy savings over standard electronic ballasts
- Up to 17% system savings when combined with new F28T8 lamps

MULT-E Kit[™]

CFL ballast replacement is a SNAP

- Three mounting configurations with one replacement kit
- Universal input voltage (108 - 305 volts)

DCL[®] DEMANDflex[®]

DEMAND CONTROL LIGHTING

The most versatile and cost effective energy management lighting system in the lighting industry today

- Capability to control lighting power ranging from 100% to 50% without the need to install expensive control wiring.
- An energy management system that is ideal for new construction or retrofit projects.
